EXPLANATION OF SYMBOLS IN TABLES

(-) Represents "0" or less than one-tenth of one percent.

(*) Denotes that respondents answering this question may have given more than one response. As such, percentages in these tables will not add to 100.

Note

Starting in 1993, expanded estimates, based on Immigration and Naturalization Service I-94 Arrivals Data, are provided for users who need to know how many travelers are represented in the report Cross-tabs. Estimates are reported at the end of Table 1 for each of the Cross-tabulations.

To convert any of the percentage figures into numbers of travelers: Use the expanded estimate total for the Cross Tab and multiply it by the percentage figure within the table. This will represent the expanded estimate for that traveler type.

Please note these are estimates and should be used as guidelines rather than absolute values. When calculating the size of a target market always round the total to the nearest thousand; the survey estimates are not precise enough to carry out to the last three digits.

For Tables and Banner points with fewer than 125 respondents, estimates should be treated with extreme caution.

If you have any questions on how to use this data, please contact ITA, Office of Travel and Tourism Industries at (202) 482-0140.
